New HD Pallet Charger™ Charges Up To 12 Batteries At Once

Dallas, TX — If you sell, stock or service lead-acid batteries, you need the **HD Pallet Charger** from PulseTech. This heavy duty rolling charger will charge up to 12 batteries at one time. It also uses our scientifically-proven *ReNew-IT Pulse Technology*® to help clean damaging lead-sulfate deposits off the battery. This buildup is the main cause of battery problems and failure. By removing these energy-dampening deposits, your batteries can accept, store and release MAXIMUM power when you need it.

- Charges and cleans up to 12 batteries at one time
- Fully automatic rolling smart charger senses battery condition and provides appropriate charge current per channel
- Prevents battery gassing so you can charge batteries while they sit on the pallet
- After being fully charged, batteries are float charged until needed
- Cleans battery plates of large damaging lead-sulfates so batteries can accept, store and release MAXIMUM power when you need it
- Eliminates charging problems usually associated with old style buss bar or gang chargers
- Very effective on deeply discharged batteries that have been taken out of service in the past
- Works with all lead-acid batteries (flooded cell, AGM and gel)
- One-switch control and progressive, easy-to-use LED read-outs
- Low resistance, very flexible, replaceable battery power leads
- Includes semi-pneumatic wheels and powder coated 14 Ga cold-rolled steel cabinet
- Built-in cable storage
- Constructed for outdoor use
- One-year Limited Warranty

To learn more about the HD Pallet Charger and the full line of patented battery-related products available from PulseTech, just call 1-800-580-7554. Or see our Web site at www.pulsetech.net. PulseTech Products Corporation is *The World Leader In Battery Performance Technology*.
