New SolarPulse Charger Helps Batteries Provide Full Power By Keeping Battery Plates Clean

Dallas, TX – PulseTech Products Corporation introduces the unique **SolarPulse® Industrial Solar Charging System**. This patented solar-powered device combines a state-of-the-art charging system with PulseTech's unique and proven *ReNew-IT Pulse Technology®*, the most effective method known for preventing the main cause of battery failure: Sulfation buildup on battery plates. SolarPulse provides clean, quiet energy to all types of lead-acid batteries, including flooded cell, AGM and gel cell. At the same time, it emits a constant electronic dc pulse that removes lead sulfate deposits on the battery plates and returns them to the battery acid as active electrolyte. By simply cleaning the plates, batteries can accept, store and release **MAXIMUM** power when you need it.

- Unique powerful solar charger provides clean, quiet energy
- Cleans battery plates of large damaging lead-sulfates so batteries can accept, store and release **FULL** power when you need it
- Helps offset energy-robbing key-off parasitic loads
- Works with all lead-acid batteries (flooded cell, AGM and gel)
- Ideal for virtually any kind of vehicle and equipment in areas without access to electrical power
- Low-profile industrial-strength solar panel mounts flat (no frame required) so it's virtually indestructible
- Prevents the normal loss of battery power on vehicles stored outside no matter how long they sit unused — even months at a time
- Helps extend battery life up to three times longer
- Three models available: 2-Watt, 5-Watt and a 6-Watt
- The 5-Watt solar panel is almost **HALF THE SIZE** of other 5-watt panels yet offers full 5-watt power
- Smaller 5-watt panel provides more installation options
- The 6-watt model is ideal for emergency rescue and law enforcement vehicles because it has a unique rectangular solar panel designed to easily mount on any light bar
- 2- and 5-Watt models include 17-feet of wire between circuit box and solar panel, and the 6-Watt includes 14 feet of wire
- Five-year limited warranty
